Developer

PROJECTS

Mobile Compatible Websites

This project is a simple Content Management System(CMS) that allow the users to compare the specification of the smart phones. One is the admin panel which is accessible only by the admin. The other side is for the public side. User can select two mobile phones and the system will generate a brief report indicating the benefits and defects.

Fitness and Nutrition Tracking App

This easy health application was created to assist people track their personal health, fitness, and nutrition objectives. After creating an account, you can quickly register your weight, water consumption, nutrition objectives, and fitness activities.

Theme Forest - Word Press

This initiative focuses on creating and developing a contemporary, adaptable WordPress site specifically for the ThemeForest marketplace. The website combines advanced design concepts with features centered around user experience to deliver a seamless and engaging journey. Utilizing WordPress, the platform harnesses customizable themes, plugins, and widgets to guarantee versatility and growth potential.
